## **BUSINESS OPPORTUNITIES FROM ISRAEL**

### **October 2018**

Company Name	<a href="#">YTS Systems Ltd.</a> (21411)
Contact Person	<b>Initial contact will be made through the Federation of Israeli Chambers of Commerce:</b> Ms. Yonat Keren International Relations Division Telephone: 972-3-5631020 Email: <a href="mailto:yonatk@chamber.org.il">yonatk@chamber.org.il</a>
Website	<a href="http://www.yts.co.il">www.yts.co.il</a>
Year of Establishment	1987
No. of Employees	40
Offer No.	92847
Summary of offer	<i>Import-Export/Services:</i> <b>Special Missions Cars, Sophisticated Solutions, Installation in Vehicles, Security Surveys, Debugging Services</b>

#### **Description of Offer**

The company focuses on the design, engineering and integration of special mission vehicles that are completely tailored to their customer's tactical and strategic requirements. For over 28 years, the company has worked with leading HLS, law enforcement, intelligence, security and military agencies around the world, to provide the most innovative and effective solutions in an increasingly complex environment. The company's vehicles are designed and built to the most demanding quality standards, with extreme attention to detail, including ergonomics, comfort and mobility.

Although the company's vehicles cannot be distinguished from other cars on the road, they are fitted with sophisticated intelligence and C2 equipment that enables them to effectively execute their missions without arousing suspicion. All of the vehicle's equipment can be manufactured in the company's facilities, and then delivered and

installed on-site.

The company's team brings a wide range of benefits and advantages into every solution that they offer as part of their extensive on- the- ground experience in Israeli intelligence and security agencies. They provide complete versatility, a broad knowledge of planning and integration, insights into automation and MMI, as well as mechanical and electrical engineering expertise.

The company has a proven track record of qualitative, discreet and superb customer service. Deployed across the globe, the company's is proud of its long-standing relationship with prestigious Tier-1 customers, in both the government and HLS sectors.

Selected customers in Israel include: Israel Ministry of Defence, Israel Defense Force, Israel Police and Border Control, Elbit Systems, Verint Systems, Israel Aircraft Industries, Rafael Advanced Defense Systems, Intel and Motorola.

The company's Advantages:

- Highly specialized design, engineering and integration capabilities
- Industry pioneer with an established track record of more than 28 years
- Professional team with real-world security experience
- A recognized leader within the HLS, security, law enforcement, intelligence, military communities.

#### **Main Business Areas:**

1. Special Mission Vehicles - Covert, Multi-purpose Intelligence – The company's covert, multi-purpose intelligence vehicle enables the streamlined execution of the most highly- complex surveillance missions.
2. Observation and Reconnaissance - For comprehensive visual observation operations, the company's vehicle serves as a superb mobile observation post for long-range coverage. The vehicle effectively supports real-time cellular and/or satellite dissemination to remote HQ or monitoring units.
3. Command, Control, Communication (C3) & Surveillance – Operating as a dual-purpose as it gathers information and functions as command center, the vehicles are equipped with sophisticated audio and visual intelligence equipment, as well as a full range of C2 equipment.
4. VIP Jammer – The company's VIP Jammer is equipped with state-of-the-art technology that transmits unique noise signals to create a firewall – effectively neutralizing and jamming wireless transmissions for remote explosive activation.
5. CSI – The Company's Mobile Cyber Forensic Lab is fully-equipped for real-time retrieving, archiving and analyzing data stored on digital devices at any location.

<b>Other Business Areas:</b>	
<p><u>Technical Surveillance Counter Measures (TSCM)</u> – For the wiretapping, detection, and monitoring field, the company creates protected areas safeguarded against illicit information theft, cyber and corporate espionage.</p> <p>Critical facilities and infrastructure protection &gt; Security training and surveys.</p>	
Potential Partners	Distributors and manufacturers of products for military, security and law enforcement forces.
Target Countries	Worldwide.
Other Information	<p>Adhering to international quality standards, MIL.STD and other specialized standards is at the core of our activity and implemented in all our business operations.</p> <p>Our product design and engineering follows strictly regulated internal procedures and processes that ensure that what we plan is up to standard.</p> <p>As integrator of products by other manufactures in our original engineering and design, we are committed to providing state-of-the-art sophisticated equipment that is standard approved, tested and above all mission proven.</p> <p>All products integrated in our design are chosen for optimized operations and enhancing the efficiency of our final products.</p> <p>Products designed for military, security and law enforcement forces are compliant to all relevant MIL.STD requirements, for quality, engineering and functionality.</p>

Year of Establishment	2009
No. of Employees	17
Offer No.	92850
Summary of offer	<i>Export/Joint Venture/Representation:</i> <b>Water Management - Advanced Leak Detection Solutions for water loss reduction, burst prevention and pipe condition assessment</b>

#### **Description of Offer**

The company's patented solutions enable utilities to pro-actively monitor their water network, tracking leaks and pinpointing their exact locations automatically on a daily basis.

To date, the company has deployed more than 5,000 sensors installed on municipal water networks in major cities in Israel, the U.S. and Europe, covering about 2000 Miles of drinking water pipelines.

This technology helps water utilities reduce their Non-Revenue-Water (NRW) and their maintenance & operational costs by using highly sensitive sensors, management software and a mobile application.

AQS-SYS applies for continuous water pipe monitoring and leak detection using permanently installed vibration and hydrophone sensors.

This system collects daily acoustic samples from sensors that are monitoring the water distribution network and correlates them automatically. Highly sensitive sensors equipped with new generation signal processing algorithms can monitor pipes of every type of material and diameter, with high efficiency and wide coverage, using typically 3 sensors per 1Mile of pipe (depending on the pipe material).

We offer a mobile leak detection system that connects to a Smartphone and uses a dedicated Android App, with an online connection to GIS maps, cloud-based data analysis and online expert support. It provides functionalities such as: listening to the leaks directly via a sensitive acoustic sensor, conducting a survey on pipes in a certain area,

correlation for most accurate and sensitive pinpointing of leaks.

Using our mobile leak detection system, the water utility can survey large areas for leaks. Data is recorded, uploaded to a cloud platform, presented locally on a GIS map (each point represents the vibration intensity in pipes) and analyzed on the server. By using two mobile sensors you can perform correlation to maximize location accuracy and pinpoint.

We are looking for potential customers & partners, local distributors, leak detection projects & tenders.

Potential Partners	Water Utilities, Water Distributors.
Target Countries	Australia, Austria, Spain, Nordic Countries, China.

<i>Offer No.</i>	82993
Summary of offer	<i>Export/Joint Venture/Representation:</i> <b>Illustrated children's books and comics</b>
<b><u>Description of Offer</u></b>	
The author, Mr. Eitan Hana, manager of the company, is a writer of children's books. He is interested in marketing and distributing his books in the native language of various countries.	

The author feels an obligation towards the children to teach them good character traits so that they will become better people and live more fulfilling and happier lives. The books' illustrations are from some of the most skilled illustrators to make sure the children enjoy the very best experience.

Examples of subjects of the books are a series of stories about a family of foxes and their adventures in the forest. Children connect to animals emotionally and therefore they are willing to take lessons from them in ethics and proper behavior.

To see a sample story on YouTube please follow this link:  
<https://www.youtube.com/watch?v=8x-RYn1Flpl&t=60s>

There are also stories of Biblical tales such as "The Binding of Isaac" and the tale of "Samson the Brave".

Some of the tales are presented as stories while others are in comic format.

The stories are marketed on Amazon in the USA and Europe as digital books, and they have been very well received.

The company is ready to send samples for your perusal.

Potential Partners	Distributors of children's books and comics in any language.
Target Countries	All countries.
